Mai Thanh Binh - Full Stack Software Engineer

Phone: 0986944663 / Email: mthanhbinh2003@gmail.com
Github: https://github.com/maibinh03

Summary

IT graduate with 1 year of experience building full-stack web applications using React, Next.js, Node.js, PHP, PostgreSQL and MySQL. Experienced in implementing web interfaces, HTTP APIs, authentication, database operations and business logic through personal projects. Seeking a Software Developer position to apply and further develop practical software engineering skills.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, PHP, C

Frameworks / Platforms: React, Next.js, Node.js, Express, Tailwind CSS

Database Management Systems: PostgreSQL, MySQL **Others**

- Good understanding of OOP, MVC and Layered Architecture;
- Solid knowledge of Data Structures & Algorithms
- Experience with Git, HTTP APIs, JWT authentication and software testing.

PROJECTS

Attendance Management System – Personal Project

Full-stack Web Application · Next.js · React · TypeScript · Node.js · Express · PostgreSQL

- Developed a web-based attendance system with separate frontend and backend applications.
- Implemented authentication, role-based access, user management, check-in/out, attendance history, filtering and statistics.
- Built Express HTTP APIs and integrated PostgreSQL for user and attendance data.

El Ripley – AI-Powered Customer Reply Platform – Software Development Contributor

Python · FastAPI · React · TypeScript · PostgreSQL

- Contributed to the development and maintenance of a customer support platform for Facebook Pages.
- Modified existing features and implemented minor functional improvements to the web application.
- Updated web interface components and refined dashboard layouts to improve usability.

AI Command Shortcut Suggestion – Personal project

Python · Machine Learning Fundamentals · Pytest

- Built a text classification pipeline from scratch to map natural-language commands to user-defined shortcuts.
- Implemented tokenization, vocabulary, embeddings, sentence representation, classification, loss, backpropagation and optimization.
- Added automated tests for training, prediction, optimization and unseen inputs.

EDUCATION

2021 - 2026

East Asia University of Technology - Information Technology

02/2025 - 03/2026

Hocmai - Intern
